EXPERIENCE

Freelance Work

Web Developer

Remote

Present

- Working as a web developer taking the initiative to seek out clients needing end-to-end web solutions for their organizations and delivering projects that frequently exceed expectations. Building web applications for different needs and experiences with languages, frameworks, and libraries, such as the MERN web stack. My project portfolio is maintained at <https://anorga.xyz/>.

University of San Diego

Junior Front-End Developer (Temp)

San Diego, United States

Dec 2019 – March 2020

- Performed maintenance of front-end codebase of Human Resources department intranet using React.
- Implemented features to new Human Resources portal in conjunction with back-end developers and designers.
- Executed data analytics project utilizing USD's HRIS Database, SQL, and Microsoft Access to collect, analyze, and migrate employee data.

Community Health Group

Data & Content Specialist

San Diego, United States

Jan 2017 – Dec 2019

- Created and maintained front-end code for Customer Relations department websites utilizing jQuery, HTML, CSS, and Bootstrap.
- Facilitated creation of internal transportation portal to track rideshare requests from health insurance clients with guidance from Senior Web Developer.
- Extracted and analyzed data from QNXT database and telephony system to create weekly reports used by the customer relations department management team. Key metrics facilitated customer service representative evaluations and were critical in the creation of best practices for department operations.

Center for Sustainable Energy

Project Coordinator

San Diego, United States

May 2015 – Jan 2017

- Developed Spanish-language websites from design specs/wireframes using HTML and CSS.
- Translation support for Spanish language used on project websites, approved by the California Air Resources Board.
- Creation of standardized operating procedures and processes for various Clean Vehicle Rebate (CVRP) projects.
- Extraction and analysis of CVRP applicant data from Salesforce used for reporting and program enhancement purposes.
